

Welcome to the Wolcott Public School Food Service Point of Sale System

Each child in the school system is assigned a meal account. The account is accessed with a personal five digit identification number (PIN) assigned to them by the school. Students will enter their PIN onto a PIN Pad at the time of purchase.

The student can pay cash daily; however, we encourage parents to prepay money into their student's account. Parents can prepay with cash or check at the school or by credit card or e check @ www.mealpayplus.com or by calling 866-883-6035.

The student's account is divided into two options: a meal account (money reserved for meals only) and a general account (money that can be used for meals and/or snack items). When sending in money to the school by check or cash, please include the student's PIN. Please indicate how much of the money should go into the student's meal account and how much should go into the student's general account. All in school payments will be credited to the meal account unless parents request that it goes into the general account.

We encourage all parents that have access to the internet, to set up an account on Mealpay. Setting up an account will allow you to check the account balance, view your child's purchases and to pay for school lunches anytime day or night. There is no fee for setting up an account or viewing account balances and purchases on Meal Pay. However you are charged a small fee by Mealpay Plus to prepay online.
